## CaseINK™ PROTEIN POLYMERS

### for water-based ink formulae

---

CASEINK products are protein polymers which act as protective colloids, co-binders and as emulsifiers in water-based ink formulae.

CASEINK PROTEIN POLYMERS promote outstanding characteristics in surface printing.

CASEINK PROTEIN POLYMERS offer hard, glossy, water, and alcohol resistant films which are solvent compatible for fast drying.

CASEINK PROTEIN POLYMERS act as a protective colloid as well as a co-binder and/or emulsifier in the ink environment. CASEINK is compatible with most other resins and latex binders.

CASEINK is non-toxic and has virtually "zero" VOC's.

CASEINK PROTEIN POLYMERS have proven to offer superior stability in ink formulations requiring high thermal stability and in systems using high heat and/or high pressure.
